

IMPORTANT NOTICE

LOSCAM RAISING SECURITY LEVEL FOR THE RECENT RANSOMWARE OUTBREAK

May 15, 2017

A highly virulent self-replicating ransomware virus called WannaCrypt0r (or WannaCry / WCry) has started its attack since May 12, 2017 in United Kingdom. It has now stormed over 150 countries and 200,000 computers are recorded being “infected”.

It is known that this ransomware would cause significant loss in the availability of information. The virus is initiated by sending a target recipient an email asking the person to open an attached document or click on web links. By doing so, the virus will be activated and the infected systems will then be asked to pay a ransom, typically in bitcoins, in order to access files that were encrypted.

The LOSCAM management is raising internal security level and instructing all departments to stay alert and report any suspicious emails if found.

Our IT Department has been monitoring the situation closely since its outbreak and taking preventive measures for any possible detrimental effect to our systems and subsequent influence to our customers. The Loscam Online and China Loscam Online are all highly secured systems, therefore it remains safe for our customers to continue daily transactions and managing their returnable package handling through them.

About Loscam

LOSCAM is a leading provider of Returnable Package Handling (RPH) solutions for use in supply chains. LOSCAM operates in 12 regions throughout Asia Pacific and is focused on delivering high quality, efficient and environmentally sustainable solutions. This has led to a position of leadership in the manufacturing and retail sectors. The business was established in the 1940s in Australia and the mid-1990s in Asia. www.loscam.com
