**DKSH Malaysia plugging into Loscam Online**

Leading equipment pooling solutions provider, LOSCAM, announced DKSH Malaysia has been added to the growing list of companies taking advantage of Loscam’s online equipment management system to streamline processes for its SAP monthly reconciliation and billing purposes.

DKSH has been using Loscam pallets since 1998 when DKSH Consumer Goods Logistics was established at Sungai Jati, Klang in Malaysia. Fifteen years of partnership has proven a solid business relationship between the two companies, enabling a variety of products to reach customers promptly and in good condition.

“For the nature of our business, it is crucial that pallets are continually available for the storage and timely distribution of our products. We can always rely on Loscam to ensure that we have sufficient supply of pallets even during peak periods,” says Lee Choon Kein, General Manager – Logistics & Supply Chain Management of DKSH Malaysia.

In a step to tighten system monitoring and control, DKSH started to use Loscam Online, downloading data from SAP for monthly reconciliation and billing purposes. Specifically, SAP implementation affords full control on system processes in terms of user access authorisation, system traceability and audit trail for all transactions performed by the user. Also, SAP reporting provides more flexibility in system development and customisation, increases operational efficiency, and helps improve overall pallet management.

Loscam is proud to be part of DKSH’s success. Lee comments, “Loscam representatives have gone beyond just providing excellent service. They took the initiative to understand our business, providing DKSH with effective solutions to service the needs of different suppliers and customers.”
