Loscam Collars and Lids

Loscam Collars and Lids are an innovative way of transforming pallets into containers for the movement of fragile or cartonised freight without the need for costly shrinkwrap. Easily added to a Loscam wooden pallet, they can be built up to any specification using a combination of collars and lids to create shelves within the unit. They support top loading and are completely collapsible to minimise the cost of reverse logistics.

Benefits:

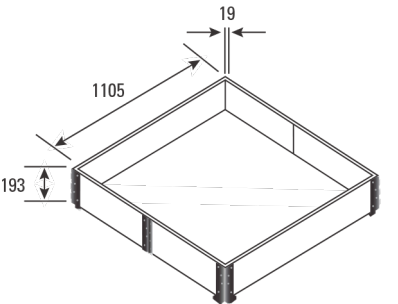

- Turns a pallet into containers by directly attaching collars on a standard wooden pallet
- Eliminates cartons and shrinkwrap
- Reduce the risk of manual handling injury
- Collars can be built up around product size and are strong enough to support top loading
- Lateral partitions separate products, minimise crushing and ensure security of valuable products
- Collapsability minimises storage and transport costs, quick to re-engage

Specifications:

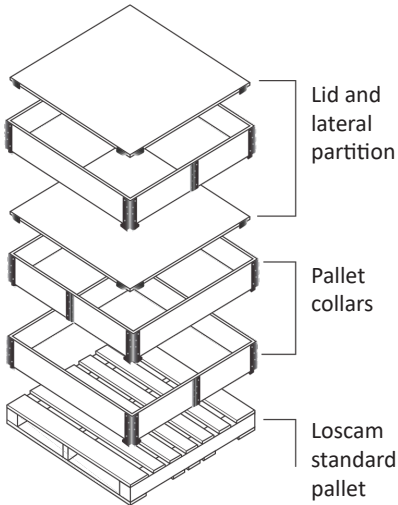

Overall Size Erect	1155 mm(L) x 193 mm(W) x 220 mm(H) Pallet-Collar Lid & Lateral Partition sheet of plywood 1155 mm(L) x 1155 mm(W) x 9 mm(H)
Overall Size Collapsed	Each side 1105 mm (L) x 193 mm (W) x 76 mm (H)
Tare Weight	<ul style="list-style-type: none">• Collar - 9.5kg• Lid - 5 kg
Gross Weight	Stackable to carry up to 6,000 kg side bearing load
Construction Material	Kiln-dried dressed pine timber with bevelled edges
Material/ Construction Characteristics	<ul style="list-style-type: none">• Hinges are galvanised pressed metal with a spiral locking pin• 4 x galvanised pressed metal right-angle corner pieces lock the lid over the pallet collars
Forklift Access	<ul style="list-style-type: none">• As per wooden pallet• 2-way entry points
Uses	<ul style="list-style-type: none">• Multiple products per pallet• Flexible configuration to suit your product requirements
