Loscam IBC IDG10

The Loscam IDG10 is an independently tested reusable IBC for highly viscous products. It has been developed to provide a best in class 1.4 SG bulk handling solution. Like the Loscam I6, the IDG10 is a one piece unit providing the customer advantages in manual handling and gains in transport efficiency, all whilst not compromising in strength. With its unique integrated lid the IDG10 also assists our customers in the handling and tracking of rented units. Smart locking solutions mean the IDG10 panels all lock into themselves (including lid) providing additional strength ensuring maximum stability.

As the IDG 10 is a one piece unit the user will no longer have to remove lids and panels in order to collapse the unit for return transport. This removes the potential of loss for individual components such as gates, sides and lids.

Benefits:

- Unique one piece design with hinged lid for ease of handling and better equipment control
- One person assembly and disassembly
- Folding front gate
- Unique universal 2 and 3 inch outlet
- Maximum discharge of product enabled by low level discharge outlet
- Modular design maximizes efficiency of storage and transport space

Specifications:

Overall Size	External - 1155 mm(L) x 1130 mm(W) x 1100 mm(H) Internal - 1090 mm(L) x 1045 mm(W) x 935 mm(H) Collapsed - 1155 mm(L) x 1130 mm(W) x 390 mm(H)
Tare Weight	170 kg
Loading Capacity	<ul style="list-style-type: none">• Max 1560 kg• Volume 1055 litres
Stacking Capacity	<ul style="list-style-type: none">• Static - 5 high when loaded, 10 high when folded• Dynamic - 2 high when loaded
Material	Chemical resistant UV protected PP and galvanised steel
Forklift Access	4 - way entry
Uses	Designed for highly viscous products that have a high specific gravity, including but not limited to paints, industrial inks, grease and lubricants, and glues and resins

Disclaimer
Recommend that users undertake acceptance testing. Packaging has been tested to UN standards and approved by a competent authority. Testing and approvals are indicated by the UN marking on each package. The Loscam IDG10 units has marking of 31HA2. It is the shipper's responsibility in all cases to confirm that the proposed contents of the package, and the quantity, are suitable for the mode of transport proposed, including any state and carrier limitations.
