LOSCAM SHINES AT MEGATRANS 2024 WITH A GREEN INITIATIVE

Melbourne, Australia – Loscam once again took center stage at Megatrans 2024, continuing as the Platinum Sponsor for the third consecutive year.

This year's event, held at the Melbourne Convention and Exhibition Centre, focused on the hot topic of Sustainability and Safety in the Supply Chain.

A Green Transformation

In support of Megatrans sustainability theme, Loscam team redesigned the networking lounge this year, using pallets painted in a vibrant green color, highlighting our commitment to environmental responsibility.

The Loscam networking lounge became a hub of activity throughout the event, drawing industry professionals keen to discuss the latest trends and innovations in supply chain management. Our green pallets provided a unique backdrop for these conversations, reinforcing Loscam's role as a leader in sustainable and safe supply chain solutions.

Set to highlight the track and trace platform with our IBC's and Bin returnable packaging solutions

During the two-day event, Loscam highlighted our innovative intermediate bulk containers (IBC) and foldable produce bins. These products are designed to meet the diverse needs of industries ranging from agriculture to automotive, offering unequalled benefits in storage, transportation, and sustainability.

Leveraging IoT technology, Loscam's track and trace platform provides real-time visibility into the supply chain, enhancing supply chain transparency. This technology allows businesses to monitor the location and status of their shipments, delivering accurate location data, ensuring timely deliveries, reducing the risk of equipment loss, and enhancing overall operational efficiency.

"Loscam Live is exceptionally effective for managing high-value assets, including our IBCs, foldable bins, and GPAK steel cage stillages. These assets are vital, and their loss

can result in substantial compensation liabilities. By implementing our tracking solution, we significantly mitigate and minimize the risk of such losses," says Michael Winter, Customer Solutions Manager, Loscam Australia.

The Next Generation of Bulk Handling: Embracing Foldable, Eco-Conscious Containers

Foldable IBCs offer significant advantages over traditional IBCs, primarily in terms of space efficiency and cost savings. When empty, foldable IBCs can be folded to a fraction of their full size, drastically reducing the space required for storage and transportation. This compact design not only lowers transportation costs by allowing more units to be delivered at once but also minimizes warehouse space requirements, leading to more efficient use of storage facilities. Further, the reduced need for return trips when transporting empty containers further cuts down on fuel consumption and associated costs, making foldable IBCs a more economical choice for the supply chain.

Loscam ANZ team

Loscam Pink Merchandise with all profits raised being donated to the NBCF's of Australia and New Zealand.

Another major advantage is the enhanced sustainability and hygiene offered by foldable IBCs with liner bags. The reusable nature of these containers, combined with disposable, recyclable liners, significantly reduces waste and the environmental footprint compared to traditional IBCs. The liners ensure that the contents remain uncontaminated, maintaining high standards of hygiene, which is particularly crucial for industries like food, pharmaceuticals, and chemicals. This combination of sustainability, cost-efficiency, and hygiene makes foldable IBCs an attractive alternative to traditional bulk handling solutions.

Looking Ahead

Loscam's participation in MegaTrans 2024 highlighted the company's commitment to sustainability and innovation within the logistics industry. The event provided a platform for Loscam to demonstrate how leveraging cutting-edge technology can lead to more efficient and eco-friendly supply chain operations.

Outstanding feedback from industry peers and customers highlights the importance of sustainable practices in today's logistics landscape. As we continue to lead by example, our efforts at MegaTrans 2024 reaffirm the dedication to reducing environmental impact while enhancing operational efficiency.

We look forward to continuing the journey towards a more sustainable and safe supply chain.

“ Foldable IBCs offer significant advantages over traditional IBCs, primarily in terms of space efficiency and cost savings. When empty, foldable IBCs can be folded to a fraction of their full size, drastically reducing the space required for storage and transportation. ”

CEO SPEAKS

As we reflect on the past year and look forward to 2025, I am filled with pride and optimism for the future of Loscam. Our commitment to sustainability, innovation, and community engagement has never been stronger, and I am excited to share some of the highlights and initiatives that will shape our journey in the coming year. This year, Loscam has made significant strides in showcasing our capabilities at various regional logistics expos. These events have provided us with invaluable opportunities to connect with industry leaders, demonstrate our innovative solutions, and explore new partnerships.

Our participation in these expos underscores our dedication to staying at the forefront of the logistics industry and continuously improving our offerings. One of the standout moments of 2024 will be our involvement in the Australia Megatrans Expo, and Loscam is honored to be a sponsor partner for the third consecutive year. This partnership highlights our unwavering commitment to promoting sustainable practices within the logistics industry.

At Loscam, our commitment to sustainability is at the core of everything we do. As a leading provider of logistics

packaging and pooling solutions, we understand the critical role we play in fostering a more sustainable future. We are actively working to improve our carbon footprint and assist our supply chain partners in doing the same.

Our corporate social responsibility (CSR) activities have also been a focal point this year. From tree planting initiatives to supporting breast cancer awareness through the Pink Pallet Campaign, our teams have demonstrated an unwavering commitment to making a positive impact on the communities we serve. These activities not only align with our Environmental, Social, and Governance (ESG) principles but also inspire us to strive for greater contributions in the future.

Internally, we have placed a strong emphasis on Occupational Health and Safety (OH&S) initiatives. Ensuring the well-being of our employees is paramount, and we have implemented several programs aimed at enhancing workplace safety and promoting a culture of health and wellness. These initiatives are a testament to our belief that a safe and healthy workforce is the foundation of our success.

As we move forward, we are excited about

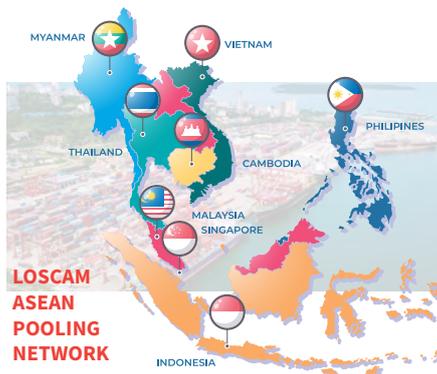

the future and the opportunities it holds. We will continue to innovate and adapt our solutions to meet the evolving needs of our customers and the environment.

In conclusion, I would like to express my gratitude to our dedicated team, valued customers, and trusted partners for their unwavering support. Thank you for your continued trust in Loscam. We look forward to building a brighter, more sustainable future together.

Sirin Limpaitoon
Chief Executive Officer

LOSCAM ANNOUNCES MARKET EXPANSION TO CAMBODIA ENHANCING GROWTH STRATEGY FOR VIETNAM OPERATIONS

Loscam, a pioneer in pallet pooling solutions, is excited to announce its strategic market expansion into Cambodia. Loscam's expansion is a part of our SE Asia growth strategy in further developing innovative pooling systems to support the evolving needs of our customers in the region.

This move is also a key part of Loscam Vietnam's growth strategy, aiming to capitalize on the vibrant economic landscape and the strong trade links between Vietnam, Thailand, and Cambodia. The expansion into

Cambodia provides new growth opportunity and further solidifies our business operations regionally to enhance Loscam's cross-border pooling solutions, enabling smoother and more efficient regional trade. By leveraging our established business relationships and network in Vietnam, we are well-positioned to provide unparalleled service in the Cambodian market.

As the 6th fastest-growing economy globally, Cambodia presents a dynamic and promising economic environment. The country has experienced a remarkable average GDP growth rate of 7% since 2011, with projections indicating continued robust growth. This positive economic outlook aligns perfectly with Loscam's vision for geographical expansion and growth through strategic market penetration and operational excellence.

Loscam has commenced small pallet movements to Vietnam-based customers with operations in Cambodia. These initial steps are part of a larger plan to scale operations in Cambodia, with a focus on building a sizeable presence by driving

pooling solutions in the market.

Looking ahead, we are enthusiastic about the opportunities this new market presents and are committed to growing our operations in Cambodia. We look forward to a future where Loscam's presence in Cambodia will not only support our growth ambitions but also bring added value to our customers, partners, and the broader economy. With a focus on sustainable growth and operational efficiency, Loscam is set to become a pivotal player in the Cambodian market, reinforcing our position as a leading provider of pooling solutions in the Asia-Pacific region.

Patrick Chan, VP of Loscam Emerging Market (Middle) and visitors

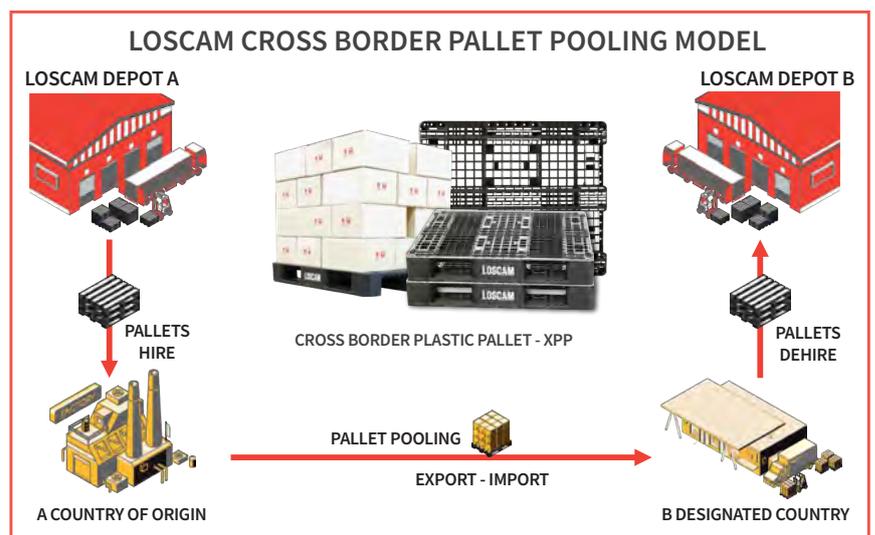

LOSCAM TAIWAN DEMONSTRATES PIONEERING SOLUTIONS AT THE 29TH TAIPEI INTERNATIONAL LOGISTICS & IOT EXHIBITION

The Loscam Taiwan team proudly showcased their innovative solutions at the 29th Taipei International Logistics & IoT Exhibition, the largest industrial technology event in Taiwan. Held from August 21 to August 24, 2024, at the Taipei Nangang Exhibition Center, the expo attracted 1,200 leading technology manufacturing companies from around the globe, featuring 4,500 booths.

This year's theme centered on the applications of AI in smart manufacturing, aiming to enhance the efficiency and competitiveness of the industrial supply chain while promoting sustainable development. The four-day event included the Smart Logistics Forum 2024, where industry professionals shared the latest technologies and experiences. Key topics included the role of smart logistics in enhancing supply chain resilience and the impact of sustainable development (ESG) on today's logistics industry.

Loscam was honored to be one of the speakers at the forum, presenting on systematized pallet transportation. Philip Pu, representing Loscam Taiwan, introduced how Loscam's Pooling Model supports the 3R principles: reuse, reduce, and recycle. The audience showed great interest in our circular model and its potential to improve supply chain cost efficiency and sustainability.

COST SAVING

FLEXIBLE

SUSTAINABLE

Throughout the four-day event, we engaged with customers from various sectors, including Petrochemical, Chemical, and Science and Technology industries. These customers, increasingly focused on reducing carbon footprints, expressed significant interest in our Pooling Model. They were particularly impressed by how our model can help them achieve their sustainability goals by minimizing waste and optimizing resource use.

We also had in-depth discussions with several companies, to understand their specific needs and how they can benefit from our XPP cross-border plastic pallets.

These pallets are designed to be durable and reusable, making them an ideal solution for companies looking to reduce their environmental impact. The interest from many industry sectors underscores the growing demand for sustainable logistics solutions that not only meet operational needs but also align

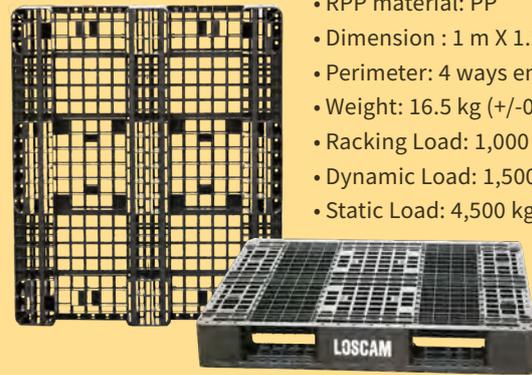

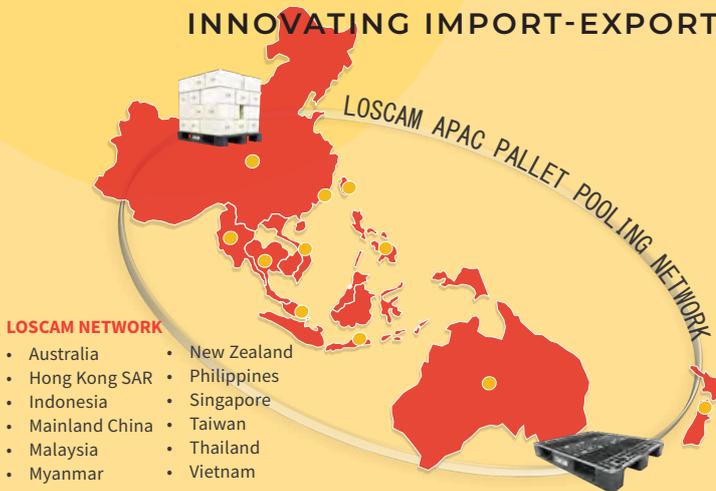

with broader environmental objectives.

Additionally, we received numerous inquiries and new leads, indicating a strong market interest in our innovative products. This positive response highlights the increasing recognition of the importance of sustainable practices in logistics and the value that Loscam's solutions bring to the industry.

“Loscam Taiwan has been collaborating closely with both domestic and international manufacturers and retailers,” shared Patrick Chan, VP of Emerging Market of Loscam. “Our active participation in major industry events over the years has not only allowed us to showcase our pioneering solutions but also to engage with industry leaders and potential clients who share our commitment to sustainability and efficiency. We are excited to build on these connections and continue driving sustainable innovation in the logistics sector.”

SUSTAINABLE SHIPPING: TRANSFORMING CROSS-BORDER TRADE WITH LOSCAM'S CROSS-BORDER PLASTIC PALLET (XPP)

INNOVATING IMPORT-EXPORT FOR A GREENER TOMORROW

- RPP material: PP
- Dimension : 1 m X 1.2 m X 0.155 m
- Perimeter: 4 ways entries
- Weight: 16.5 kg (+/-0.5 kg)
- Racking Load: 1,000 Kg
- Dynamic Load: 1,500 kg
- Static Load: 4,500 kg

In today's world, sustainability is crucial. Loscam is making a significant impact on cross-border trade with our Cross-Border Plastic Pallet (XPP). This innovative solution enhances logistics efficiency while promoting eco-friendly practices. As businesses increasingly seek sustainable alternatives for their export-import logistics packing and solutions, Loscam XPP stands out for its durability and versatility.

The Loscam Cross-Border Plastic Pallet (XPP) is engineered with cross-border pallet in mind. With a standard Asian footprint of 1000 x 1200 mm and made from recycled polypropylene, this pallet is designed for multiple use. It is lightweight yet robust, offering high resistance to staining and low moisture absorption. Its durability and ease of cleaning make it ideal for cross-border logistics, where pallets must endure various handling and environmental conditions.

Let's explore how the XPP can be implemented in real-world scenarios, highlighting its benefits and positive impact on sustainable supply chains.

THE CHALLENGES: OPERATIONS INEFFICIENCY AND HIGH VOLUME WASTE GENERATION

A large food manufacturer operating across multiple regions in Asia Pacific faced significant challenges in their logistics operations. They used to rely on traditional one-way pallets, resulting in high costs associated with pallet purchase, disposal, product damage during transit, and inefficiencies in loading and unloading processes. The company sought a more sustainable and cost-effective solution to improve their supply chain efficiency while reducing its environmental footprint.

THE CLEAR ADVANTAGES OF XPP

Durability: Constructed from high-quality recycled materials, the XPP is built to withstand the rigors of transportation and storage. Its resistance to moisture and chemicals ensures that products remain safe during transit.

Reusability: Unlike traditional one-way pallets, the XPP is designed for multiple trips. This feature significantly reduces waste and lowers costs associated with purchasing new pallets.

Standardization: The uniform design of the XPP enhances compatibility with various transport and storage systems. This standardization simplifies handling processes, improving overall efficiency in the supply chain.

Lightweight Design: The XPP is both lightweight and sturdy, making it easy to handle while maximizing load capacity. This design helps reduce shipping costs and improve fuel efficiency.

IMPLEMENTATION RESULTS

Upon implementing the Loscam Cross Border Plastic Pallet (XPP), the food manufacturer experienced significant benefits:

Cost Savings: Switching to the XPP allowed the company to reduce direct costs associated with pallet purchases. They also eliminated expenses related to one-way pallet disposal and waste removal.

Operational Efficiency: The standardized design of the XPP streamlined loading and unloading processes. The manufacturer

reported a noticeable decrease in manual handling times, resulting in faster turnaround times for shipments.

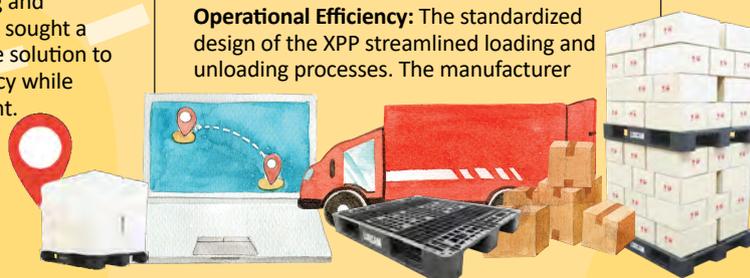

Reduced Damage Rates: With improved durability and stability during transit, the manufacturer saw a marked reduction in product damage. This not only safeguarded their goods but also enhanced customer satisfaction.

Sustainability Impact: By adopting a pallet pooling model, the manufacturer aligned their operations with sustainability goals. The shift contributed to a lower carbon footprint and demonstrated their commitment to environmentally responsible practices.

A GREEN LEAP FORWARD

The successful implementation of Loscam's Cross Border Plastic Pallet (XPP) has transformed the logistics operations of our customers. Our solutions empower businesses to lower their carbon footprint without sacrificing efficiency or reliability. As businesses continue to seek environmentally friendly alternatives, the XPP stands out as a reliable choice that delivers both economic and ecological benefits.

Join us in promoting greener shipping practices that positively impact sustainable supply chains.

Breaking New Ground: Loscam Thailand's Success at Major Logistics Events

Innovative Solutions and Sustainability Take Center Stage

Loscam Thailand participated in two major logistics expos in 2024: the Logistics Automation Expo 2024 and Logimat Intelligent Warehouse 2024. Known for its innovative pooling solutions and high-quality wooden pallets, Loscam Thailand continues to lead the industry.

The Logistics Automation Expo 2024 and Logimat Intelligent Warehouse 2024 are key events in the logistics industry. They showcase the latest advancements in automation, warehousing, and supply chain solutions. These expos bring together industry leaders, innovators, and professionals to explore cutting-edge technologies and sustainable practices shaping the future of logistics.

SHOWCASING ADVANCEMENTS AND SUSTAINABLE SOLUTIONS

At both exhibitions, Loscam Thailand highlighted its latest innovations, focusing on our cross-border plastic pallets (XPP) and foldable IBCs (Intermediate Bulk Containers). These products attracted significant interest from visitors and customers eager to learn about the benefits and efficiencies of Loscam's pooling solutions.

The cross-border plastic pallets (XPP) offer a sustainable alternative to traditional one-way disposal pallets. They reduce waste and enhance the efficiency of cross-border logistics by being reusable and durable. Similarly, the foldable IBCs provide a modern solution for transporting bulk liquids and dry goods. Unlike

traditional rigid IBCs, these foldable containers save space when not in use, making them highly efficient for storage and transport.

During the exhibitions, visitors from the automotive, tyre, and hand-held tools industries showed great interest in our foldable IBCs. Our team demonstrated the product's usage and its benefits. Aphinat Bunnag, Regional Key Account Manager of SE Asia, said, "Our Foldable IBCs are designed to streamline logistics operations, enhance storage efficiency, and lower transportation costs. By offering robust and reusable packaging that optimizes space and reduces waste, customers from these sectors recognize the significant benefits in terms of durability, sustainability, and cost-effectiveness that our Foldable IBCs bring to their supply chains."

Compared to traditional rigid IBCs, Loscam's foldable IBCs offer several advantages. Traditional IBCs are bulky and occupy significant space even when empty, leading to higher storage and transportation costs. In contrast, our foldable IBCs can be collapsed when not in use, reducing storage space requirements by up to 75%. This feature not only lowers logistics costs but also minimizes the environmental impact by reducing the number of trips needed for transportation.

In addition to hardware industries, our foldable IBCs with liner bag solutions offer significant benefits to the liquid food and beverage sectors. These liner bags ensure the safe and hygienic transportation of liquids, preventing contamination and preserving product quality. The liner bags are easy to install and remove, making the cleaning process more efficient and reducing

contamination. By integrating these features, we provide a comprehensive, sustainable packaging solution that meets the diverse needs of various industries.

POSITIVE RECEPTION ENGAGING WITH THE INDUSTRY

Visitors at both expos were particularly impressed by the sustainability aspects of these products. The cross-border plastic pallets (XPP) and foldable IBCs meet the growing demand for eco-friendly solutions in the logistics industry.

In addition to showcasing products, Loscam Thailand engaged with industry experts and potential clients through interactive sessions and live demonstrations. These interactions provided deeper insights into how Loscam's pooling solutions can be integrated into various supply chain operations to enhance efficiency and reduce costs.

The events were a great success, with Loscam Thailand not only highlighting its commitment to sustainability in the supply chain but also generating numerous new leads, underscoring the importance of sustainable and efficient logistics solutions. Loscam Thailand's participation in these expos strengthened its position as a leader in the industry, showcasing its innovative solutions, commitment to sustainability, and collaboration with key industry stakeholder to build a green supply chain.

UNITING KNOWLEDGE AND FUN: HIGHLIGHTS FROM THE LOSCAM WA USERS GROUP

The Loscam Western Australia (WA) team has hosted an engaging Loscam User Group (LUG) Session that combined educational insights with interactive games. Set against the breathtaking backdrop of Perth's Kings Park, the event provided a unique opportunity for participants to enhance their understanding of Loscam's pooled equipment while enjoying a lively atmosphere.

Whilst enjoying lunch and drinks attendees participated in a dynamic quiz, testing their knowledge and skills related to Loscam's offerings. Jade triumphed in the trivia competition, proudly taking home the coveted Loscam Gold Pallet trophy!

The Loscam WA Users Group Event blends networking and learning in a fun interactive setting. We look forward to more events that continue to elevate logistics knowledge while strengthening our connections within the Loscam community.

LOSCAM'S 2023/24 SAFETY AWARDS: CELEBRATING EXCELLENCE IN WORKPLACE SAFETY

“ We take pride in our safety focus and celebrate the positive trending around injury reductions. We have a goal of ZERO injuries within the workplace and will continue to work hard until this objective is realized.”

We are thrilled to announce the winners of Loscam's 2023/24 Safety Awards, recognizing outstanding dedication to safety in the workplace.

Greater China (GC) team has been awarded the esteemed Gold Safety Award for their unwavering commitment to maintaining the highest safety standards. The GC team's efforts in reducing lost days by 70% compared to the prior year, with less than seven lost days in 2023/24, are particularly commendable. This award, evaluated on rigorous criteria, underscores their dedication to surpassing safety standards.

In addition, Australia and New Zealand (ANZ) team has been honored with the prestigious Safety Silver Award for their exceptional efforts in reducing lost day rates by 50% compared to the prior year, achieving less than 14 lost days in 2023/24. This remarkable achievement was evaluated based on total annual work hours, incidence of lost time, reported injuries, and aggregate lost workdays.

Daniel Bunnnett, EVP of Loscam ANZ, remarked, “We certainly take pride in our safety focus and celebrate the positive trend in injury reductions. Our goal is ZERO injuries, and we will

continue to work hard until this objective is realized. This award reflects the safety focus and effort of our 370 team members, and it will be proudly displayed across our sites.”

At Loscam, safety is our top priority. These awards not only recognize the exceptional achievements of our teams but also emphasize the importance of adhering to strict safety protocols. We hope everyone continues to uphold a strong safety mindset, ensuring a safe and productive working environment for all.

CELEBRATING OUR COMMITMENT TO THE ENVIRONMENT

Loscam Philippines Tree Planting Initiative

In line with Loscam’s commitment to environmental sustainability and in celebration of Environment Month 2024, the Loscam Philippines team proudly participated in a meaningful tree planting activity organized by the Cabuyao River Protection Advocates (CaRPA). This year’s theme, “Our Environment, Our Future,” underscores the critical link between the health of our planet and the well-being of future generations.

On June 21, 2024, at the break of dawn, our enthusiastic team gathered at Brgy. Carmen, Silang, Cavite, to contribute to the Multisectoral Tree Planting Activity Beyond Bagong Cabuyao. Each member of the Loscam team planted two seedlings, resulting in a total of 12 new trees that will grow and thrive, symbolizing our commitment to a greener future.

The event was not just about planting trees; it was a powerful reminder of our responsibility towards the environment. Our team found the experience profoundly meaningful and is already planning to collaborate with our suppliers for another tree-planting initiative next year. Catherine Jimenez, General Manager of Philippines Loscam, shared with

us, “We plan to expand this initiative by inviting our clients and suppliers to participate in this impactful project. This collaborative effort will not only strengthen our community bonds but also align with our company’s ESG initiatives, reinforcing our commitment to environmental stewardship. By engaging our broader network in these activities, we aim to amplify our positive impact on the environment, fostering a culture of sustainability and shared responsibility.”

Reflecting on this event, it is a reminder that every small action contributes to a larger impact. By working together, a significant difference can be made in creating a better world for future generations. It is important to continue embracing the role as stewards of the environment and to inspire others to do the same.

LOSCAM’S COMMITMENT TO COMMUNITY SHINES THROUGH PAKENHAM EELS PARTNERSHIP

Loscam is thrilled to announce its recent donation to the Pakenham Eels Rugby League Club in Australia, supporting the development of their “All Abilities” program. Based in Southeast Melbourne, the Pakenham Eels Rugby League Club offers Rugby League and Touch Football opportunities to individuals of all ages and abilities. This initiative aligns perfectly with Loscam’s commitment to ESG principles, particularly in fostering inclusivity and community support.

The “All Abilities” program is designed to provide individuals of all abilities the chance to participate in a modified version of rugby league. Throughout the 2024 season, the club ran a series of clinics, welcoming participants aged 4 to 21 with varying levels of abilities. Many of these young athletes face daily challenges associated with physical or mental

disabilities, including cerebral palsy, down syndrome, autism, global developmental delay, and ADHD.

Michael Winter, Customer Solutions Manager of Australia, shared his thoughts: “The All Abilities program was developed by our club to encourage the inclusion of participants of all abilities, offering an introduction to Rugby League in a safe, fun, and friendly environment. Facilitating this program has afforded opportunities for over 12 participants during the 2024 season. We’ve seen such growth in the participants, both from a motor skills perspective and on a social skills level.”

Thanks to Loscam’s donation, the Pakenham Eels Rugby League Club was able to invest in essential equipment to facilitate these clinics.

The season culminated in a celebration where participants were awarded medals, recognizing their achievements and dedication.

Looking ahead, the Pakenham Eels were recently recognized by Monash Health and were finalists in the Sports Club and Inclusions categories for both their All Abilities and Female Development Programs.

Loscam’s support for the “All Abilities” program underscores our dedication to making a positive impact in the communities we serve. By enabling inclusive sports opportunities, we are committed to creating a more equitable and supportive environment for all.

LOSCAM CORPORATE HONG KONG JOINS PINK WALK 2024

A Step Towards a Healthier & Brighter Future

Loscam is proud to announce its participation in the Pink Walk 2024, a significant event dedicated to raising awareness and funds for breast cancer research and support. This year, our Corporate Hong Kong team, along with their family members, came together to take part in this meaningful endeavor, marking the second consecutive year of our involvement.

The Pink Walk, held annually, is more than just a walk; it is a powerful movement that brings together individuals and organizations committed to making a difference in the fight

against breast cancer. On the day of the event, the Loscam team, dressed in vibrant pink attire, joined thousands of other participants at the starting line, ready to walk in solidarity with those affected by breast cancer.

Our team's participation in the Pink Walk 2024 is a testament to Loscam's ongoing commitment to corporate social responsibility (CSR). By involving not only our employees but also their families, we aim to foster a sense of community and shared purpose. This event provided an opportunity for our team

members to bond outside of the workplace while contributing to a cause that touches many lives.

Looking ahead, Loscam is dedicated to maintaining its support for the Pink Walk and other CSR initiatives. We believe that by actively participating in such events, we can help create a healthier and more compassionate world. Our involvement in the Pink Walk 2024 is just one example of how we strive to make a positive impact on the communities we serve.

2024 LOSCAM PINK PALLET CAMPAIGN: A TRIUMPH IN SUPPORT OF BREAST CANCER FOUNDATIONS

The 2024 Loscam Pink Pallet Campaign achieved remarkable success, thanks to the unwavering support of our dedicated customers who registered their Loscam Pink Pallets and the generosity of our suppliers who contributed donations.

fostering awareness and support for an important cause. Our pink merchandise consistently garners enthusiasm from both customers and team members alike.

This year, we are particularly excited to announce that the new Frank Green Bottle has helped us with a record breaking year in Merchandise sales! Its stylish design and practicality have made it a favorite among everyone. All profits from these sales are directed to the Breast Cancer Foundations, significantly impacting the ongoing fight against breast cancer.

We extend our heartfelt gratitude to every customer and team member who purchased

Pink Pallet products this year. Additionally, we wish to acknowledge the entire ANZ team for their hard work in ensuring the success of our annual program. It is truly a testament to the saying that many hands make light work.

Each year, it brings us immense joy to witness the vibrant pink pallets traversing the supply chain across Australia and New Zealand. These shades of pink carry a profound message,

#LOSCAMPINKPALLET 2024
