Loscam IBC IDG10

The Loscam IDG10 is an independently tested reusable IBC for highly viscous products. It has been developed to provide a best in class 1.4 SG bulk handling solution. Like the Loscam I6, the IDG10 is a one piece unit providing the customer advantages in manual handling and gains in transport efficiency, all whilst not compromising in strength. With its unique integrated lid the IDG10 also assists our customers in the handling and tracking of rented units. Smart locking solutions mean the IDG10 panels all lock into themselves (including lid) providing additional strength ensuring maximum stability.

As the IDG 10 is a one piece unit the user will no longer have to remove lids and panels in order to collapse the unit for return transport. This removes the potential of loss for individual components such as gates, sides and lids.

Benefits:

- Unique one piece design with hinged lid for ease of handling and better equipment control
- One person assembly and disassembly
- Folding front gate
- Unique universal 2 and 3 inch outlet
- Maximum discharge of product enabled by low level discharge outlet
- Modular design maximizes efficiency of storage and transport space

Specifications:

Overall Size: External - 1155 mm(L) x 1130 mm(W) x 1100 mm(H)
Internal - 1090 mm(L) x 1045 mm(W) x 935 mm(H)

Tare Weight: 170 kg

Max. Gross Weight: 1,560 kg

Volume 1,055 litres

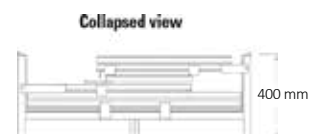

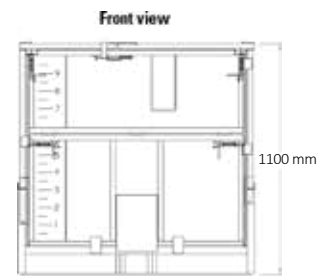

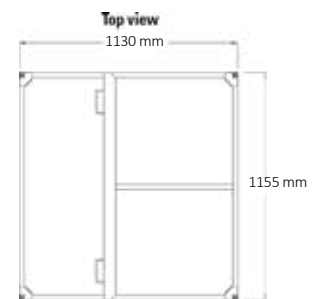

Stacking Capacity:

- In transit - 2
- Static - 5

Material: Chemical Resistant UV Protected PP, Galvanized Steel frame

Forklift Access: 4-way entry

Uses: Designed for highly viscous products that have a high specific gravity, including but not limited to paints, industrial inks, grease and lubricants, and glues and resins.
